

WHAT IS IT DISASTER RECOVERY (DR) REVIEW?

In today's dynamic environment, your business is at risk of major disruptions without regular reviews and audits of your backup strategy and DR plan. Our IT DR review assesses your business readiness to deal with unexpected cyberthreats or events. We evaluate whether your current IT DR plan is in accordance with industry best practices and covers all critical IT systems, processes and network recovery essentials required to meet your business objectives.

The IT DR review culminates in an overview report that highlights your current DR plan's gaps and gives practical recommendations to enhance your IT resilience and DR capabilities.

When do you need an IT DR review?

- IT Resilience** → Are you aware of your critical processes and IT systems?
- Compliance** → Do you meet minimum service level requirements?
- Continuity** → Need quick operational restoration with minimal disruptions?

How we can help:

- IT Priorities** → Business impact and dependency analysis
- Preparedness** → Validation of current DR plan's effectiveness
- Actionable Insights** → Recommendations on backup and recovery strategy

ABOUT US

Stone Forest IT (SFIT) specialises in providing advisory, implementation and managed services for IT infrastructure, IT security solutions, business applications (ERP and CRM) and business analytical tools. Backed by a team of certified professionals from specialised domains with insights into industry best practices, we are well-positioned to address your unique business needs and IT concerns.

As the IT services arm of the Stone Forest group, we leverage our accounting background and cross-border expertise to assist growing organisations as a one-stop business partner.
